<p>Example:</p> <p>Mr. Tinker begins a lesson on perspective by showing Albrecht Durer's engravings St. Jerome dans sa Cellule and Melancolia, and the photograph Portico of Attalos in the Agora. He shares the Big Idea of Perspective and students look for lines that would be parallel in real life, along with vanishing points. They learn that perspective has been used to add realism to art since the 1400s in Florence, Italy. They will consider the Key Question, "What kinds of things make things around you look different?"</p> <p>Mr. Tinker illustrates the same view from multiple perspectives (e.g., from above, from the side) to further emphasize the Key Question and defines horizon line and vanishing point. Students select an object from their environment to draw in multiple perspectives.</p>	

After completion, students will participate in a written and oral class critique with the key input being about the artwork solution to the Key Question. Students will evaluate their own artwork and add it to their portfolio body of work that constitutes evidence of their learning.
