Providing a balance between photographic technique and content, this unit is designed to increase students' appreciation of the uses of photography as art and information. They start by considering the Big Idea of Information. After being asked the Key Question, "Can a photograph give information?" students categorize photographs taken by others and pre-sorted by the teacher into six groups: descriptive, explanatory, interpretive, ethically evaluative, aesthetically evaluative, and theoretical.

Then students begin to use these categories for their own photographs. Finally, students choose one category and make a 10-slide silent sequence for projection. Class discussion following each sequence focuses on the importance of a clearly articulated theme and developmental sequence.

After completion, students will participate in a written and oral class critique with the key input being about the artwork solution to the Key Question. Do the photographs contain clearly communicated information? They will also present the photographs in an exhibition on campus inviting commentary.

Students will evaluate their own artwork and add it to their portfolio body of work that constitutes evidence of their learning.

Differentiation Strategies for Students with Special Needs
